printer prime

Estamos aquí para estar a largo plazo.

Estamos orgullosos de presentar nuestra nueva colección de dos colores: Printer Prime. Durante el desarrollo de Printer Prime la prioridad fue hacer una colección más sostenible enfocada en la reducción del impacto ambiental negativo. Todos los productos están hechos de algodón orgánico y/o poliéster reciclado de botellas PET. Printer Prime consiste en prendas modernas que se pueden usar en casi todos los sectores. Los materiales se eligen para que puedan durar mucho tiempo.

Vestas

Recycled polyester

For the Printer Prime garments, we use recycled polyester.

Organic Cotton

The cotton in Printer Prime is organic cotton.

Biobased & Compostable

The packaging is made of biobased & compostable PLA-material.

Recycled Materials

1 jacket = 55 recycled bottles*

Durante el desarrollo de Printer Prime la máxima prioridad fue crear una colección más sostenible enfocada en el ahorro de agua, la reducción de las emisiones de dióxido de carbono y permitir una larga vida útil del producto. Utilizamos el marco LCA (Life Cycle Analysis) para calcular las emisiones de dióxido de carbono y el ahorro de agua para garantizar que la producción tenga el menor impacto ambiental. Cada prenda está hecha de algodón orgánico y/o poliéster reciclado de botellas PET postconsumo. El algodón orgánico se cultiva sin pesticidas químicos ni fertilizantes artificiales, que son dañinos para la vida silvestre, el suelo y también para quienes trabajan con él. El poliéster reciclado da nueva vida a las botellas de PET, lo que permite reducir la dependencia del petróleo como materia prima para las necesidades de los tejidos. Además, el embalaje también se desarrolla teniendo en cuenta la sostenibilidad: el papel está hecho de papel reciclado y las bolsas están hechas de PLA, un material biodegradable.

* The amount of recycled polyester in a Prime softshell jacket (men size L) is calculated to correspond to the amount of polyester in 55 PET bottles (550 ml). Data for other Printer Prime products available on printeractivewear.com

Smarter Construction

Las prendas de la colección Printer Prime están hechas de materiales sólidos, esto significa que los productos duran el mayor tiempo posible. La vida útil de la prenda es el factor más importante para prevenir el desperdicio y reducir su impacto ambiental. Lo más importante que podemos hacer como consumidores para frenar el impacto negativo sobre el medio ambiente es comprar menos prendas pero de mejor calidad. Con Printer Prime eliges prendas de calidad y de larga duración. La ropa se puede lavar a 60ºC, por lo tanto, las prendas quedan limpias tanto de las manchas como higiénicamente. La colección Prime puede incluso secarse en secadora a baja temperatura (máx. 60ºC) y ha sido probada para el lavado industrial de acuerdo con EN ISO 15797.

Hemos diseñado la línea de una manera moderna para que se pueda usar en la mayoría de los sectores profesionales. Una colección que se adaptará a todos. Nuestra colección es inclusiva: de XS a 2XL para mujeres y de S a 5XL para hombres.

What is Printer Prime?

CERTIFIED ORGANIC COTTON
Our cotton is organically grown and is traceable back to the source. It enables transparent, consistent and comprehensive independent evaluation and verification of the content of organic material on products.

CERTIFIED RECYCLED POLYESTER
The polyester used in the garments comes from certified recycled materials, controlled via an international, voluntary product standard.

OEKO-TEX®
CONFIDENCE IN TEXTILES
STANDARD 100
SE 14-218 Swerea IVF

OEKO-TEX
Oeko-Tex 100 is one of the most well-known labels for textiles that have been tested for harmful substances. It stands for customer trust and high product safety. When a textile product bears OEKO-TEX, standard 100 label, you can be sure that every part of this article, ie. every thread, button and other accessory, has been tested for harmful substances and that the article is therefore environmentally harmful.

PRO
EN ISO 15797

EN ISO 15797
EN ISO 15797 specifies test procedures for evaluating workwear intended for industrial laundry. The tested products fall under the above ISO procedure. In accordance with this standard, they retain their fit, are color-fast and are made of materials that shrink moderately, even with repeated washing.

60°

60° C INDUSTRIAL WASH
The Printer Prime garments are tested to withstand industrial washing up to 60 ° C. In addition, there is a pocket inside for placement of so-called washing chips for easier handling. The garments can also be tumble dried at up to 60° C.

WASHING CHIP POCKET
All items from our Prime collection are equipped with a washing chip pocket in the left side seam. With simplified handling and traceability as a result.

DEGRADABLE PACKAGING
Our Printer Prime garments are packed in a bio-based, compostable PLA-bag. It is certified by TUV Austria, which guarantees the compostability of the packaging (and that it is made of compostable material). The ink on the polybag is water-based to minimize chemical contamination.

INFORMATION
Via printeractivewear.com (QR code above) you can find more information about CSR and the sustainability of the Printer Prime collection, including the ecological footprint.

LCA

LIFE CYCLE ASSESSMENT
During the development of Printer Prime, we used a cradle to gate LCA framework to calculate carbon dioxide emissions and water saving to ensure that the production have less negative environmental impact than comparable garment production.

EXTRA WIDE SIZE RANGE 5XL XXXXXL
EXTRA WIDE SIZE RANGE 2XL XXL

MANY SIZES
Printer Prime offers a wide range of sizes. From XS to 2XL in women and for men S all the way up to 5XL. Our Unisex model is available from XS to 5XL. Everything for everyone.

ALL PRICES ARE RECOMMENDED APPROXIMATE PRICES AND ARE STATED EXCLUDING VAT, SHIPPING AND ANY POST-PROCESSING (EG PRINTING AND EMBROIDERY). WE RESERVE THE RIGHT FOR PRICE ADJUSTMENTS. WITH RESERVATION FOR FINAL SALE AND PRINTING ERRORS. THE PRICES APPLY UNTIL FURTHER NOTICE.
